

# NULLODOR Cat Litter for each stage of life!

Nullodor  
Kittens and Small Pets

Nullodor  
Adult Cat

Nullodor  
Mature Cat

**NULLODOR makes having  
a cat even more fun!**

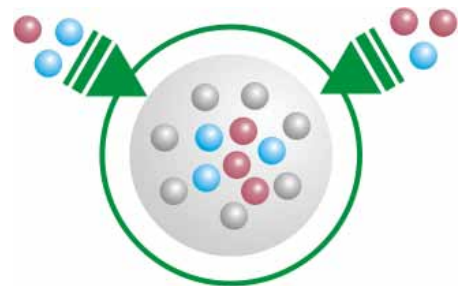

## How Does It Work

**NULLODOR** is a natural product made from very pure Silica gel and water. The mixture is gently heated at high pressure for several days. The slow evaporation of the water causes micro-pores and micro-capillaries to form, enabling each tiny silica crystal to instantly draw any moisture away from the surface to its centre.

Each silica crystal has an absorption rate of 150%. Liquids are absorbed in a fraction of a second, then the water evaporates slowly to leave dry litter that can be re-used for a long time.

**NULLODOR** completely locks away odours for a month. They are absorbed at the same time as the liquids. Whilst the liquids evaporate, the odours are trapped in the centre of the silica granules, totally blocking ammonia emissions.

Liquids and odours  
absorbed in seconds

Odours are locked inside;  
liquids evaporate
